

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY JUNE 3, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light nationally with 198 new fires reported. Two new large fires were reported, one each in southern California and the Southern Area. Four large fires were contained, two in northern California, one in southern California and one in the Southern Area. Very high to extreme fire indices were reported in Arizona, California, Colorado, Nevada, New Mexico, Texas and Utah.

ALASKA AREA LARGE FIRES:

TOK RIVER, State of Alaska. A Type 2 Incident Management Team (Reed) is assigned. The fire is burning in black spruce, tundra and mixed hardwoods, five miles southeast of Tok, AK. Less active fire behavior was observed yesterday, with isolated interior torching and creeping along portions of the perimeter. Line construction continues today, and structure protection remains in place. Increase in acreage is due to more accurate mapping.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
TOK RIVER	AK	AKS	5,760	40	6/10	358	18	16	5	0	1.2M

NORTHERN CALIFORNIA AREA LARGE FIRES:

LUHI, Hawaii Volcanoes National Park. This fire was started by lava from the Kilauea Volcano. The fire is burning in grass, brush and rainforest on the Island of Hawaii. Crews are mopping up hotspots along the perimeter. No significant change occurred.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

OUTLOOK:

Weather Discussion: Across the western third of the United States, high pressure is in control keeping conditions dry and warm. Breezy conditions will be in place today from the northern Sacramento Valley northward through the Pacific Northwest. In the central and eastern states, low pressure will produce showers and thunderstorms in the Plains, near the Gulf Coast and along the Eastern Seaboard. In Alaska, a few isolated thunderstorms will occur over central interior sections and the Alaska Range.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
ALASKA AREA Central Interior Mostly Cloudy west Partly Cloudy for Eastern and Southeastern Interior South central partly cloudy	55 to 70, mid-60's most common 55 to 70	18 to 40%, driest in Southeast Interior and in fire vicinity 36 to 48 %	Southwest/west to 15mph South to 15 mph near Alaska Range. Southeast 5 to 20 mph
ROCKY MOUNTAIN AREA Isolated to widely scattered afternoon thunderstorms. Partly sunny.	65-75 mountains 75-85 lower elevations	15%-20% west, with 25%-40% east.	Mainly variable at 5-15 mph.
SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog into the coastal valleys, otherwise mostly sunny, except becoming partly cloudy in the afternoon east of the Sierra crest with a slight chance of thunderstorms.	80-95 Mountains 85-100 Valleys 95-110 Deserts	15-25% Mountains 20-40% Valleys 5-15% Deserts	SW-NW 5-15 mph.
SOUTHWEST Partly cloudy. Isolated wet and dry thunderstorms western NM and scattered strong to severe storms plains of eastern NM and west TX.	70s and 80s mountains and 80s to 90s lower elevations, except 98 to 105 far southern deserts.	8-20%, except 25- 35% plains of eastern NM and west TX.	W to SW 5-15 mph AZ and western NM, easterly 5-15 mph eastern NM and west TX.

Standard Fire Orders

The NWCG approved a revision of the Standard Fire Orders, in accordance with their original arrangements. The orders are arranged according to their importance and grouped in logical sequence. Review and consider Standard Fire Orders as a part of every shift.

- Did you receive or request adequate weather briefing, current and predicted fire behavior, wind direction, predicted humidity, fuel moisture, local factor?
- Do you have map of the fire? Is topography, type of fuels, direction of the spread defined?
- Fire behavior group deals with what the firefighter will encounter - weather, fire status, fire behavior.
 1. Keep informed on fire weather conditions and forecasts.
 2. Know what your fire is doing at all times.
 3. Base all actions on current and expected behavior of the fire.
- Are you familiar with direction, distance, location, size of escape routes and safety zones?
- Discuss the need for lookout, such as extreme fire behavior, fire located out of line-of-sight.
- Discuss importance of the situational awareness.
- Fireline safety group emphasizes personal safety.
 4. Identify escape routes and safety zones and make them known.
 5. Post lookouts when there is possible danger.
 6. Be alert. Keep calm. Think clearly. Act decisively.
- Review importance and means of passing tactical decisions and resource movement.
- Review other factors influencing potential changes in tactics, which could affect control of your forces.
- Organizational Control group is centered around tactical decisions.
 7. Maintain prompt communications with your forces, your supervisor and adjoining forces.
 8. Give clear instructions and insure they are understood.
 9. Maintain control of your forces at all time.
- After you have considered, discussed and acted on the previous nine orders:
 10. Fight fire aggressively, having provided for safety first.
